

Household Battery Recycling

(WEEKLY)

WHERE CAN I BRING THEM?

WHY CAN THEY BE DANGEROUS?

Batteries contain a mixture of chemical elements and heavy metals such as lead, mercury and cadmium. When disposed of improperly, batteries can negatively impact human and environmental health.

WHY RECYCLE BATTERIES?

Many batteries contain critical minerals, raw materials that are economically and strategically important to the U.S. They have a high supply risk potential and no viable substitutes exist.

DELAWARE BATTERY RECYCLING

DSWA offers free battery collection. Small yellow bins can be found at most facilities. Please place batteries in correctly labeled bins.

WHAT ARE BATTERIES RECYCLED INTO?

DSWA partners with Call2Recycle for battery recycling. Old batteries can be recycled into pots and pans, golf clubs, silverware and new batteries.
